In a response given by Te Beretitenti, that works to rehabilitate the seawall, boat channel and copra shed of Tebikeriki will all be completed last year. I regret to say but that has not been the case.

May I ask Government again when will exactly the rehabilitation works at Tebikeriki wharf including the copra shed be completed?

Translation/Rairana

I moved a written question in the August 2017 session regarding internet connectivity on my island while at the same time requested Government if it could assist in repaying the outstanding dues with ATHKL. The response to the question emphasized more on the need to restore connectivity with no mention of any repaying the council's dues until now the internet connection still has not been restored.

Government is now understood to be undertaking actions, through the assistance of the Communications Commission of Kiribati (CCK) to restore and improve internet connectivity to the islands of Kuria and Aranuka respectively. This was exactly what I had in mind when I moved the question though Government appears to have been oblivious to the issue. However, I would like to ask Government again, if CCK would be able to render the same assistance of restoring and improving internet connectivity for the Beru island Councils?

Translation/Rairana

In response to an oral question last year, Te Beretitenti affirmed that remedial works to patch the eroded coasts of the islands would start by mid 2017, especially on the retaining seawalls of the sea water salt pond at Aotukia and the algae pond at Taboiaki. No works have ever been undertaken, so I would like to ask again when exactly will such works be undertaken?

OQ4. Translation/Rairana

A motion I moved in the August 2017 session was accepted, where the stevedoring rates for the loading and unloading of vessels will be increased and to explore the possibility of funding the increase from the freight levy fund. I just want to follow up by asking Government the latest development on the issue and when is it likely to be implemented?
