***Translation/Rairana***

Well-water from village wells of Maiana Atoll namely from Tekirai to Bubutei have been tested from the Ministry of Health. From the tests, it is clear that there are some well-water that are not potable even though it may be good for laundry and watering of gardens. I am so grateful for the test conducted.

In connection to this, I want to request the Minister responsible if he can ask his team from the Ministry to take another step after testing as to what measures they may take to ensure that the life-supporting water can be used for drinking and whatnot?
